DETAILED ACTION

Election/Restrictions

Claims 63 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/27/2008.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 3773

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 54-62, 64-65 are rejected under 35 U.S.C. 102(e) as being anticipated by Martin-5,575,817.

As to claims 54-62, 64-65, Martin-'817 (Fig. 1-2; col. 2: lines 17-30; col. 3: lines 2-39) discloses a branched prosthesis including proximal prosthesis 1 or female portion, distal prosthesis 2 or male portion frictionally fitted inside prosthesis 1 and radiopaque 12 substantially as recited in the present claimed invention.

The present invention claims priority based on EP 94400284.9 (2/9/1994) and EP 94401306.9 (6/10/1994), which are prior to the Martin-'817 reference. However, the seniority of the Martin-'817 and this application will depend on a result of one interference case between Martin-'817 and a parent case of this present application. If the Applicant does not agree that Martin-'817 is prior art, the Examiner will have to wait until after the interference case between Martin-'817 and the parent case of this application has been resolved so that further proper action can be taken.
